

12/14 DPB Open Meeting Minutes

There is no money in the treasury.

Meetings are twice a week: 8pm on Wednesdays and Noon on Saturdays.

Adrenaline wants everyone to know he's 'excited'.

Modelers:

Intimidator has the Blazer almost entirely done.

Bryan misplaced his Max8 license.

Mappers:

Mercenarius will be working hard on Norrington next week.

Bryan still can't figure out what a proshop looks like.

Ry_goody will make some textures.

Coders:

WKYA is so sexy that everyone forgot what he reported on.

Vino has successfully moved SVN to our server

Web:

Adrenaline wants an officer report section devoted just to him.

He will install the IRC and Arcade scripts for the forums.

He has been pwned by his school, and will be able to complete the forum skin
sometime next week

Kuja disabled tcp access to the mysql server for security reasons.

Old Business:

Kuja tells everyone how paintballs are going to be handled, as per last meeting.

Adrenaline asks about norrington. It's the main map in the demo.

Shortigo mentions a referee – there probably won't be enough time for him in the
demo. (except for maybe an appearance in the training level)

New Business:

Kuja tells everyone about email and webspace. If you don't have email and/or
webspace, talk to Kuja

Kuja tells everyone about the dpb-dev mailing list. Use the list!

You can change your password for ftp/email by ssh'ing (using putty) to
team.digitalpaintball.net.

Kuja will be working on installing webmail at some point.

Kuja tells everyone about SUBVERSION, the versioning system that's going to
be used to house all of dpb. He tells everyone to go download tortoise svn,
from <http://tortoisesvn.tigris.org>. Make a folder, right click, svn checkout.

The repository path is <http://svn.digitalpaintball.net/dpb/trunk/>. All the team
members should know their usernames and passwords. If they don't,
contact Kuja or Vino.

Kuja talks about the Tutorial, and picking Shortigo up for a night of hot sex, paintball, and development.

Everyone talks about motion capture. Discussion is suspended until Nobody can be present.

RyGoody submits a mp3 file of Kuja singing terribly to subversion. This is a good time to note that NOTHING SUBMITTED TO SVN CAN EVER BE DELETED. Don't fool around, yo.

Bryan, Goody, and Intimidator need to discuss baking.

Shortigo talks about foliage, almost obsessively. Shrubbery?

Bryan makes a shelf. <http://team.digitalpaintball.net/bryan/img/shelf1.jpg>

Adrenaline asks about the GUI. He also mentions BF2, and some other lame ideas.

Adrenaline catches Kuja's pitching during the screening of Narnia.

Adrenaline motions to adjourn. 6-0-0 motion passes.
